

WISI GNCI

Software licence for one CI interface

Description

The CHAMELEON decryption via Common Interface are enabled by the SW option GNCI (single Common Interface). The CHAMELEON module has two Common Interface slots accessible from the rear of the module. Complying to the EN 50221, and supporting multiservice decryption via professional CAMs the CHAMELEON CI implementation gives professional decryption for all types and sizes of Headends.

At a glance:

- Dual CI slots
- Multi-service decryption via professional cams
- Each CI slot connectable to any input source
- Decryption on service level and on PID level
