

WISI GNFMADV

Software option for decoding of HE-AAC audio for FM radio outputs

Description

The CHAMELEON HE-AAC decoding is enabled by the SW option GNFMADV. It supports MPEG1 Layer III, HE-AAC(-LC), HE-AAC v2(-LC). The decoded audio is then FM modulated. The FM modulation requires SW option GNDFM or GNOCTFM.

At a glance:

- Decoding of HE-AAC(v2)
- Software option valid for one module
