WISI GNPISCR8

Software option for Pro:Idiom scrambler

CHAMELEON
SOFTWARE-BASED HEADEND PLATFORM

Description

Pro:Idiom Scrambling in the CHAMELEON is enabled by the SW option GNPISCR8. GNPISCR8 allows you to use the CHAMELEON as a scrambler for encryption of the output services by uploading a Key via the web interface or using the standard key. The end-customer device - TV set can descramble the content without an additional CAM and Smart Card.

Scope of delivery

- After buying the software option you can download the enitlement file which includes the software option on www. wisiconnect.tv.

At a glance:

- LG Pro:Idiom Scrambler
- Excellent Content Protection solution
- No external CAS connectioon necessary
- Multiple service scrambling
- PID level scrambling
- Support scrambling of MPEG-2 and H.264 in SD and HD
- Descrambling without CAM and Smart card
