

WISI GT GCINS

Software option for insertion of an Guide Channel

Description

The insertion of a Guide Channel in TANGRAM is enabled by the SW option GTGCINS. A manually created text file can be uploaded to the TANGRAM, which gets converted into a TS stream and distributed in parallel to regular TV services. Available for GT23W US version.

Scope of delivery

- After buying the software option you can download the entitlement file which includes the software option on www.wisiconnect.tv.

At a glance:

- Insertion of a Guide Channel as an additional TV service
- Flexible manual adaption in text form
- One software option per headend system required
